

Education

Lebanese University

Hadat, Lebanon

M.Sc. in Artificial Intelligence

2024 - 2026

Bachelor of Science in Computer Science

2021 - 2024

Relevant Coursework: ML, DL, Computer Vision, LLM, NLP, Data Structures and Algorithms, Design Patterns, Parallel programming, OOP, DBMS, Network Security.

Experience

Hanz Baustallen

Stuttgart, Germany (remote)

Software Engineer

Sep 2024 – present

- Developed a Next.js / React web app for construction teams to manage projects and generate invoicing.
- Led the migration of the production backend from Kotlin/Ktor to Java/Spring Boot — architected a package-per-feature Spring Boot 3 rewrite (JPA/Hibernate, Spring Security + JWT, Flyway) across 25+ domains, preserving the existing REST contract so mobile clients required no changes.
- Cut average request-handling time by 50%+ on Java/Spring backend services by implementing database-side stored procedures over ORM-layer logic.
- Designed and implemented an MCP server that bridges a REST backend with LLM clients, exposing 30+ tools, with request-scoped authentication so clients can query data in natural language.
- Built an agentic LLM extraction pipeline backed by the Anthropic Claude API that turns multilingual worker voice transcripts into schema-validated structured tasks, grounding the model with per-request customer context to resolve spoken references to real records.
- Implemented real-time speech-to-text over a WebSocket proxy for low-latency live captioning.
- Built and shipped a cross-platform mobile app (Expo/React Native), owning the full release pipeline to the iOS App Store and Google Play.
- Migrated Supabase storage buckets to AWS S3, reducing infrastructure costs and improving control over storage management, access policies, and scalability.

Vanrise

Beirut, Lebanon

Full-stack Developer Intern

Aug – Sept 2024

- Built a Full-Stack application using .NET MVC Architecture, Angular, ADO.net, MS SQL, and Bootstrap.

Certifications

- AWS Certified Solutions Architect — AWS — Sep 2026
- Advanced MCP — Anthropic — Apr 2026
- AI for Business — MinnaLearn — Sep 2025
- AWS Certified Cloud Practitioner — AWS — Jul 2024
- CS50 — Harvard University — Aug 2024
- DELF B2 — France Éducation international — Aug 2021

Projects

Management System for the Lebanese University, Faculty of Science — 2024 · 4 months

Led development of a dynamic university management system for handling user authentication, data retrieval, and management, with dedicated interfaces for students and managers — providing a seamless experience for managing university-related data.

Crypto Currency Application — 2024 – 2025 · 3 months

Developed a dynamic cryptocurrency converter and exchanger application using React for the frontend and Node.js (MVC pattern) for the backend. Integrated a live API for real-time cryptocurrency rates and conversion. Hosted the React frontend on GitHub Pages and deployed the Node.js backend on Render.com.

Senior Project — Harmony Sync: Bridging Spotify and YouTube — 2025 · 4 months

Leveraged the Spotify API to access a user's music library and the YouTube API to find corresponding music videos, with a user-friendly interface for customization and organization.

Habit-tracking Tool — 2025 – 2026 · 2 months

Built an interactive habit-tracking tool as a node-based graph editor (Next.js, React, TypeScript, ReactFlow) — users create and connect nodes on a canvas, with a form-driven side panel (React Hook Form + Zod) for editing node data.

ArcVault Intake-Triage — Apr 2026 · 1 month

Built an agentic n8n workflow for a take-home technical assessment that ingests unstructured customer messages, classifies them by category and priority, extracts entities, routes them to the correct team queue, and flags low-confidence or high-risk cases for human escalation.

Skills

Programming Languages: C, C#, Python, JavaScript, Java, Kotlin, PHP, SQL, HTML, CSS

Frameworks: Next.js, Express.js, Angular, ASP.NET MVC, ASP.NET Web API, React Native, Expo, Ktor

Libraries & UI: React, Tailwind CSS, Bootstrap, shadcn/ui, Material UI, JavaFX, Apache POI, JUnit

Databases & ORM: PostgreSQL, Supabase, Prisma, Drizzle, NoSQL

Authentication & APIs: JWT, Auth.js, REST APIs, Swagger, Postman

Developer Tools: Git, GitHub, VS Code, Visual Studio, IntelliJ IDEA, Cursor, MCP Inspector

AI & LLM: Claude, Gemini, LangGraph, LLMs, Agentic Workflows

Languages

Arabic — Native

English — Professional Working Proficiency

French — B2 (DELF)
